

Standards Development & Revision Procedure

Version 2.0.0

Fair Trade USA

A. Introduction

Fair Trade USA is committed to following best practices in developing and revising our standards, including:

- Defining the objectives of the standard and justifying the need for its development or revision;
- Identifying directly and indirectly affected stakeholders and providing them with information about the standard development/revision process and how they can participate;
- Holding public consultations and ensuring that there is a balance of interests participating;
- Providing a variety of opportunities and tools for stakeholders to participate, such as teleconferences, meetings, and webinars;
- Ensuring a variety of opinions are given equal weight and providing for balanced decision-making;
- Making standards and supporting documents publicly available and reviewing our standards on a regular basis.

This document outlines the process we will use to develop and revise our standards, keeping the above best practices in mind.

B. Objective

The objective of this procedure is to ensure a transparent and equitable standards-setting process which allows ample opportunity for stakeholder engagement, in line with the ISEAL Code of Good Practice for Setting Social and Environmental Standards.

C. Scope

This procedure applies to the development and revision of all existing and future Fair Trade USA standards, across all product types and categories. This procedure does not apply to the development or revision of Fair Trade USA policies, for example those related to certification, pricing, or labeling.

1. Steps for Developing Standards

1.1. Initiating Standards Review

1.1.1. Fair Trade USA may internally initiate the review or development of a standard, or it may be requested at any time by any stakeholder by writing to standards@fairtradeusa.org.

1.1.2. All standards are reviewed at least every five years.

1.1.3. The Fair Trade USA Standards Team will evaluate all proposals and Fair Trade USA's Senior Management Team will decide if the proposal requires the development of a new standard or if a major or minor revision to an existing standard is required.

1.1.4. The drafting process is led by the Standards Team at Fair Trade USA. During the drafting process, key experts and stakeholders including certification bodies may be consulted for advice.

1.1.5. The annual work plan will list all major and minor revisions to occur throughout the year and is available on the website. At the beginning of a standards development or major revision process the Project Plan will be made public on the website.

1.2. Project Plans

1.2.1. For all new standards development and for any major revisions to existing standards, Fair Trade USA will develop an unique Project Plan to document the process which includes:

- The objective and rationale of the need for the new standard or revision;
- A summary of the activities and steps to be taken, with an approximate timeline;
- Decision-making procedures and who is responsible for decision-making; and,
- Contact information for how to contribute to the consultation process.

1.2.2. Project Plans for Fair Trade USA standards are made publicly available on the Fair Trade USA website at the beginning of the standard revision or development process. Any interested party may comment on and suggest changes to the Project Plan.

1.3. Advisory Committee

1.3.1. For certain revisions and/or new standards development, Fair Trade USA may create an Advisory Committee consisting of external stakeholders with expertise in the relevant product or industry.

1.3.2. Advisory Committees may assist in the standards drafting process, analysis of feedback received during public consultation, and/or field testing phases of the project. Roles and responsibilities of the Advisory Committee will be outlined in the Project Plan wherever relevant.

1.4. Revision Types

1.4.1. There are four types of standards revision at Fair Trade USA; minor, major, urgent, and new standards development. The revision type dictates the process that is followed for public consultation and content approval.

1.4.2. Minor revisions include, but are not limited to, improving or clarifying language, correcting typing or grammatical errors, updating references to other standards where these have changed, or allowing for a change in the scope of products eligible for the standard. Minor revisions do not require a significant change in practice of the Certificate Holder.

1.4.3. Fair Trade USA may make minor revisions to standards at its discretion, without conducting stakeholder consultation.

1.4.4. Fair Trade USA's Vice President of Certification, Standards, and Impact approves any minor revisions.

1.4.5. Major revisions are modifications of a standard that significantly change the intent and are substantive in nature. Major revisions typically require a change in practice by the Certificate Holder.

1.4.6. Major revisions require stakeholder consultation and content approval as described in this procedure.

1.4.7. Any five-year review of an existing standard is considered a major review.

1.4.8. All new standards development follows the process required of major revisions for both stakeholder consultation and content approval.

1.4.9. An urgent substantive revision may take place in-between regular revisions as deemed necessary by the Vice President of Certification, Standards and Impact or the Standards Director. Urgent revisions will follow the steps outlined in this Procedure and the consultation period(s) may be reduced.

1.5. Stakeholder Identification

1.5.1. Core stakeholder groups include those directly and indirectly affected by the standard, for example: producers, industry partners, NGOs, workers, traders, retailers, and external experts such as producer support organizations.

1.5.2. Care is taken to specifically identify stakeholder groups that are not adequately represented, and proactively seek their contributions. This includes addressing constraints faced by disadvantaged stakeholders.

1.5.3. The FTUSA Standards Team develops and/or update a list of stakeholders relevant to the standards' scope and its social, environmental and economic outcomes. This list will guide outreach to stakeholders to ensure representative participation.

1.6. Public Consultation

1.6.1. Either the Vice President of Certification, Standards, and Impact or the Senior Management Team is responsible for approving the first draft of the standard for public consultation. The party responsible for approving public drafts will be identified in the relevant Project Plan.

1.6.2. Once a draft has been approved for public consultation, Fair Trade USA will publish the draft standard on the website and actively solicit feedback from stakeholders. Feedback may be collected via teleconferences, meetings, personal conversations, webinars, written submissions, and field tests.

1.6.3. The public consultation period for new standards development or major revision of existing standards includes at least 60 days for comment submissions by stakeholders.

1.6.4. For new standards development a second round of consultation of at least 30 days is included.

1.6.5. For existing standards undergoing major revision, a second round of consultation of at least 30 days may occur, as needed.

1.6.6. If feedback is not received from all core stakeholder groups, a special effort will be made to contact these groups to solicit feedback.

1.6.7. Where substantive, unresolved issues persist after the consultation round(s), or where insufficient feedback was received, Fair Trade USA carries out additional rounds of consultation, as necessary.

1.7. Analysis of Feedback

1.7.1. All feedback received during the consultation period will be compiled, analyzed and discussed internally at Fair Trade USA. Feedback will also be discussed with the Advisory Committee, when applicable.

1.7.2. All comments will be taken into account and considered on an objective and equitable basis.

1.7.3. For each draft as well as the final version of the standard, a public summary of the comments received during the previous consultation round, and how they were taken into account, will be made available on the Fair Trade USA website.

1.7.4. The feedback summary will be shared directly with those that submitted comments.

1.7.5. Feedback from any one round of consultation may be considered for subsequent standard reviews and revisions.

1.8. Decision-Making

1.8.1. The Fair Trade USA Board is responsible for approving the final content of all new standards and all major standards revisions, although they may delegate this decision-making to the Senior Management Team or the Vice President of Certification, Standards, and Impact.

1.8.2. The precise decision-maker for content approval will be identified in the relevant Project Plan.

1.8.3. Decision-making on standard content is reached by consensus whenever possible. Should the decision-making party be unable to reach consensus, approval of specific content is put to vote in accordance with the Terms of Reference of the Board of Directors.

1.9. Revisions to This Procedure

1.9.1. This procedure will be regularly reviewed. Interested parties may provide feedback on this procedure and suggestions for improvement by writing to standards@fairtradeusa.org.
